

CRYSTALLINE SILICA ALTERNATIVE

DO YOU HAVE CONCERNS ABOUT THE HEALTH & SAFETY OF CRYSTALLINE SILICA IN YOUR WORKPLACE?

If you do have these concerns, RESCO Products' ALKATROL and PYROTROL are proven alternatives to the use of silica flour in many ceramic applications. Whiteware, Dinnerware, Sanitary Ware, Ceramic Tile, Brick, and other Ceramic industries have successfully used our PYROTROL and/or ALKATROL in place of silica flour, and have reduced their crystalline silica exposure.

- Fires Very White in Color
- Higher Fired Strength
- Lowers Thermal Expansion
- Widens Firing Range
- Reduces Warping
- Improves Thermal Shock Resistance
- Alkali content of Alkatrol helps Lower Firing Temperature

PYROTROL 2253/3504

ALKATROL 22535/20031
